

HPS 2020 - Strategic Plan and Committee Responsibilities

Goals and Objectives	Committees and Directors
1. Promote the science and sound practice of radiation safety	Director for Goal 1
1.1 Support and improve educational curricula of health physics and radiological sciences	Science Support
1.2 Support international initiatives to develop radiation protection standards and radiation safety practices	International Collaboration
1.3 Support national initiatives to develop radiation protection standards and radiation safety practices	Standards
1.4 Support the practice of high-quality radiological measurements	LAAC/LAPC
2. Enhance Support for Society Membership	Director for Goal 2
2.1 Optimize and communicate the value and benefits of Society membership	Society Support
2.2 Solicit and address member concerns	Society Support
2.3 Ensure effective internal communications with the membership	Society Support
2.4 Ensure effective support to sections, chapters and student branches	Society Support
2.5 Mentor future leaders of the Society	Society Support
2.6 Optimize use of the Secretariat's capabilities in Society operations	Executive
3. Provide enhanced scientific and professional development	Director for Goal 3
3.1 Conduct high quality technical programs at society meetings	Program
3.2 Support the conduct of society meetings	Local Arrangements
3.3 Expand access to and the quality of member education opportunities	Continuing Education (at meetings), PDS (other)
4. Promote the health physics profession	Director for Goal 4
4.1 Recruit and retain Society members	Membership; Student Support
4.2 Recognize and reward health physics achievements	Awards
4.3 Identify future Society leaders	Nominating
4.4 Encourage students to pursue health physics careers	Academic Education
4.5 Preserve the history of the health physics profession and the Society	History
4.6 Strengthen the financial health of the Society	Finance
5. Ensure the Society's role as the source of expertise in radiation safety	Director for Goal 5
5.1 Provide credible, unbiased position statements and policy guidance	S&PIC
5.2 Provide reliable and useful information about radiation safety to government officials	Homeland Security; Government Relations
5.3 Provide reliable and useful information about radiation safety to the media	Public Information; Homeland Security
5.4 Provide reliable and useful information about radiation safety to general public	Public Information; Homeland Security
6. Promote collegial relationships between the Society and other professional organizations	Director for Goal 6
6.1 Strengthen relationships with other professional organizations	Intersociety Relations
6.2 Provide liaisons to selected professional organizations	Intersociety Relations
6.3 Communicate the positions of the Society on radiation safety issues with other organizations and the scientific community	S&PIC
